NURSING & ITS SCOPE ...

Now Nursing is the choice of many students, it is a profession of dedication, care & love. If you choose nursing, you will discover a career filled with personal and professional rewards. Nursing can offer a career that is both personally and financially rewarding.

Traditionally nursing was considered as a profession for woman and nursing training in many colleges and institutes were confined to woman, but the trend is gradually changing in world as men are also seen choosing nursing profession because of the abundant job opportunities.

Nurses work in various medical establishments including Hospitals, community and public health agencies, rural and public health services, army, Navy and Air force services, ambulance care centers, homes for the aged, international organizations, WHO, UNICEF, disaster relief campus and where ever people need healthcare services in all countries of the world.

The shortage of nurses in the USA and European countries and Arab countries has opened up abundant opportunities for nurses. Thousands of talented youngsters can make use of this golden opportunity.

Salary:

In India you can expect a salary starting from 15,000/- - 50,000/- Monthly

In foreign countries:
80,000/- - 4, 00,000/- Monthly.

MAYA ANGELO**

PARAMEDICAL & ITS SCOPE

If a person completes a two- or three-year course and becomes an authorised person to work as a technician in a specific area of medical industry, s/he is called a paramedic. The professional is an integral part of the hospital and becoming one is highly rewarding both in India and abroad. Without paramedics, the entire Health Industry is out of gear and is almost non-functionary. With the development of medical science and complex medical equipments, demand for qualified and trained paramedical manpower is growing. According to the World Health Organisation's recommendations, one doctor requires at least 8 support health personnel and this means India needs more than 12 lakh doctors and about 96 lakh support staff. In addition, the strength of support personal is also inadequate and developing use of technology in the field of medicine has resulted in a number of specializations, super specializations and sub specializations

Job Opportunities

Placements happen during the final year. The pay package for freshers is generally low and after completing 6 months - 1 year, an able paramedic can expect a decent hike. As a paramedic, you can work in hospitals, nursing homes, blood banks, manufacturing firms, dairy institutes, pharmaceutical labs, public health labs, diagnostic laboratories, rehabilitation centres, special treatment centres, etc.

Be a Paramedic to discover the great realms of Human health and can earn good money. It's a hidden treasure, which's not known to many. A Few who found the hidden treasure are now the masters in the field of Health Care & Medical Sciences. Currently they have better opportunities and bright prospects than any MBBS / BDS graduate.

A Paramedic is a professional who helps the doctors in specialized areas and facilitates for better diagnosis, treatment and therapy.

The increase in number of patients, variety of diseases & the demand for immense treatment have paved the way for Paramedical Professionals who are expert technicians or therapists providing better quality to human health care.

OT (Operation Theatre Technician)

Various electrical and electronic equipments are in use in modern operation theatres for monitoring anesthesia and surgical procedures. The course is designed to assist anesthesiologist in the operation theatre, CCU, Post Operative rooms as well as in the operation and maintenance of theatre equipments and hospital pipeline system as the success of procedures and safety of patients largely on the reliability, smooth and trouble free performance of this equipments and skilled anesthesia.

What Does an Operation Theatre Technician

Do?

Operating room technicians may go by a number of different names including surgical technologists, scrubs or surgical room technicians. They are responsible for assisting doctors and nurses before, during, and after a medical operation. For example, an operating room technician may be responsible for setting up sterile equipment and ensuring that it is working properly. The technician may also help prepare the patient by sterilizing incision sites and transporting the individual to the operating room.

During the surgery, an operating room technician will pass surgical instruments to doctors as needed, cut sutures, prepare specimens for laboratory analysis and apply dressings. In addition, they may be responsible for counting equipment, such as sponges and needles, to ensure that all equipment is properly disposed. After surgery, the operating room technician may transfer the patient to a recovery room before cleaning and restocking the surgical room.

Who Can Join ?

Pass 10th - 3 year Course

Pass +2 Science - 2 Year Course

A Promising Career

Renal Dialysis Technician

Dialysis is a medical procedure that acts as an artificial kidney by removing waste from the blood and excess fluids from the body when kidney failure or disease prevents them from doing so. Dialysis technicians are responsible for operating the machines that do this and monitoring the patients undergoing treatment.

According to the U.S. Bureau of Labor Statistics, www.bls.gov, health care and social assistance will generate 5 million new jobs between 2012 and 2022. The National Kidney Foundation, www.kidney.org, reports that more than 20 million Americans have chronic kidney disease and the number of people with diabetes, the leading cause of end-stage renal disease, continues to grow. Currently, the median salary for a dialysis technician is \$35,558 in January 2014, according to Salary.com, www.salary.com.

Salary

In India you can expect a salary starting from 15,000/- 45,000/- Monthly

In foreign countries:

75,000/- - 3,50,000/- Monthly.

CAMPUS

An eco friendly Green Campus

Ambika Institution has a separate own building and is situated in fine place which is free from pollution and crowd and having adequate space to meet the learning needs of students.

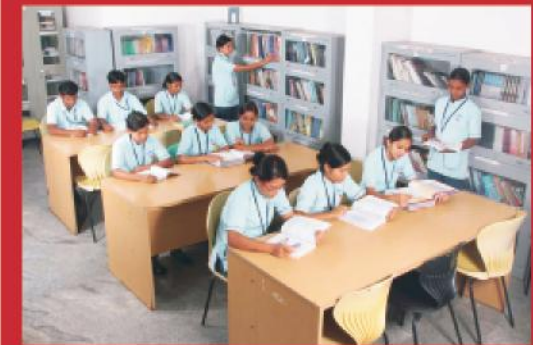

CLASS ROOM

There are adequate classrooms with the capacity of accommodating all the students admitted in each class. The rooms are well ventilated and properly lighted. Each classroom is equipped with Black Boards, OHPs, LCD and a Public address system..

LIBRARY

The library at the Ambika Institute is a store house of knowledge stocking more than 9,000 books of current Medical and Nursing titles and subscribes to about 140 journals.
